OLYVETTY is an audio-visual entity formed by Riccardo Benassi and Claudio Rocchetti. Between 2006 and 2012 it participated in several European festivals with techno noise live sets on the threshold of hearing.

OLYVETTY gave life to sets characterised by a destructive performativity and video materials; the space of the dance club was elected as the optimal setting for presenting experimental documentaries on the history of industry.

After its last show at the Triennale in Milan, OLYVETTY has disappeared. Today - more than four years later - Marsèll Records puts an end to this hibernation by releasing *On Blue Rai*, a limited edition LP that condenses in 4 tracks and 4 remixes what has happened since.

OLYVETTY questions what we remember: *On Blue Rai* is permeated with new sounds and a new live approach, in organic harmony with a world that has changed.
